**THE PUBLIC ACCOUNTANTS EXAMINATION**  
**COUNCIL OF MALAWI**

**2013 EXAMINATIONS**

**ACCOUNTING TECHNICIAN PROGRAMME**

**PAPER TC 1: ACCOUNTING/1**

**WEDNESDAY 4 DECEMBER 2013**

**TIME ALLOWED : 3 HOURS**  
**9.00 AM - 12.00 NOON**

**SUGGESTED SOLUTIONS**

1. (a) Sales day book (or sales journal or simply sales book).

Purchases day book (or purchases journal or simply purchases book).

Returns inwards day book (or returns inwards journal or returns inwards book); in every case 'returns inwards' may be substituted by the term 'sales returns'.

Returns outwards day book (or returns outwards journal or returns outwards book); 'returns outwards' may be referred to as 'purchases returns'.

Cash book or petty cash book.

General journal (or journal if the term day book is used for other books of original entry).

- (b) (i) Purchases Day Book

|      |                     |                  |

(31) Total for month 3,930,000

Purchase Account  
(31) Total for month 3,750,000

2. (a) Bonya Manufacturers Limited  
Manufacturing Account for the year ended 30 June 2013

|                                        | K                | K                |
|----------------------------------------|------------------|------------------|
| Direct materials, 1 July 2012          | 260,000          |                  |
| Purchases                              | <u>2,550,000</u> |                  |
|                                        | 2,810,000        |                  |
| Less: inventory at 30 June 2013        | <u>310,000</u>   | 2,500,000        |
| Direct wages                           |                  | <u>1,000,000</u> |
| Prime cost                             |                  | 3,500,000        |
| Factory wages                          |                  | <u>554,000</u>   |
|                                        |                  | 4,054,000        |
| Work-in-progress 1 July 2012           | 168,000          |                  |
| Less: work-in-progress at 30 June 2013 | <u>126,000</u>   | <u>42,000</u>    |
| Manufacturing cost of goods completed  |                  | <u>4,096,000</u> |

The additional marks indicated above are for correct presentation of the items concerned (format).

- (b) Unless dealt with in isolation, a manufacturing account is normally linked with a trading account (and the income statement/the profit and loss account) by transferring either the manufacturing cost of goods produced or the marketing value of the goods produced to the trading account. The figure is equivalent to the entry for 'purchases' which may be found in the trading account of a non-manufacturing entity.

Apart from this slight amendment, the preparation of a trading account for a manufacturing entity is exactly the same as it is for a trading entity.

Note to markers: (Marks should be awarded for any reasonable explanation).

- (c) Allocating items to the accounts listed:

- (i) Gross profit brought down – profit and loss account
- (ii) Sales – trading account
- (iii) Direct labour – manufacturing account
- (iv) All financial charges – profit and loss account
- (v) Opening and closing inventories of finished goods – trading account
- (vi) Direct expenses – manufacturing account
- (vii) All administration expenses – profit and loss account

(viii) Indirect manufacturing costs – manufacturing account.

3. Indicating accounting effects of the transactions on the accounting equation, showing the amounts and naming the assets and liabilities to be affected:

| Transaction number | Effects on assets                                                              | Effects on liabilities                    | Effect on capital               |  |
|--------------------|--------------------------------------------------------------------------------|-------------------------------------------|---------------------------------|--|
| (a)                | Increase in inventories by K1,783,500                                          | Increase in creditors by K1,783,500       | No effect                       |  |
| (b)                | No effect                                                                      | Decrease in liabilities by K628,325       | Increase by K628,325            |  |
| (c)                | Decrease in debtors by K370,000<br>Increase in bank by K370,000                | No effect                                 | No effect                       |  |
| (d)                | Decrease in cash by K10,000                                                    | Decrease in loans by K10,000              | No effect                       |  |
| (e)                | Increase in land and buildings by K1,388,000<br>Decrease in bank by K1,388,000 | No effect                                 | No effect                       |  |

| (g)                | Decrease in cash by K77,000                                                    | Decrease in payables/creditors by K77,000 | No effect                       |  |
| (h)                | Decrease in inventories by K60,000                                             | Decrease in payables/creditors by K60,000 | No effect                       |  |
| (i)                | Decrease in cash by K172,000                                                   | No effect                                 | Decrease in capital by K172,000 |  |
| (j)                | Increase in inventories by K488,000. Decrease in cash by K488,000              | No effect                                 | No effect                       |  |

## 4. Calculation of gross profit under:

|                         |          | (a)<br>FIFO<br>K | (b)<br>LIFO<br>K | (c)<br>AVCO<br>K |
|-------------------------|----------|------------------|------------------|------------------|
| Sales                   | (Note 1) | <u>860,000</u>   | <u>860,000</u>   | <u>860,000</u>   |
| Opening inventory       |          | -                | -                | -                |
| Purchases               | (Note 2) | 420,000          | 420,000          | 420,000          |
| Less: Closing inventory | (Note 3) | <u>80,000</u>    | <u>50,000</u>    | <u>60,000</u>    |
| Cost of goods sold      |          | 340,000          | 370,000          | 360,000          |
| Gross profit            | (Note 4) | 520,000          | 490,000          | 500,000          |

Workings

- Sales

$$25,000 \times 12 = 300,000$$

$$35,000 \times 16 = \underline{560,000}$$

$$860,000$$
- Purchases

$$35,000 \times 5 = 175,000$$

$$10,000 \times 6 = 60,000$$

$$10,000 \times 6.5 = 65,000$$

$$15,000 \times 8 = \underline{120,000}$$

$$420,000$$
- Closing inventory in terms of units = 70,000 (i.e. 35,000+10,000+10,000+15,000)  
less 60,000 (i.e. 25,000 + 35,000) = 10,000 units

|    | FIFO    | LIFO    | AVCO    |
|----|---------|---------|---------|
| at | K8      | K5      | K6      |
| =  | K80,000 | K50,000 | K60,000 |

- Gross profit in each case is sales less cost of goods sold.
- FIFO: Sold 35,000 then 10,000 then 10,000 then 5,000; LIFO sold 15,000 then 10,000 then 10,000 then 25,000; AVCO at average for all transactions during the reporting period =  $K420,000/70,000 = K6$ .
- (a) A business transaction is recorded as both a debit entry and a credit entry (also referred to as 'double entry') to fully reflect the effects of the transaction on the entity. Every transaction affects the entity in two ways. This is usually referred to as the 'dual concept'. The two effects mean that the accounting equation (assets – liabilities = capital) will apply consistently to the entity. For example, if expenses are paid in cash, the entity is affected by an increase in the expenses and a reduction in cash. The increase in expenses would cause a reduction in the profit,

and therefore capital. Thus both assets and capital are reduced, and the accounting equation will continue to apply (any simple example is acceptable).

(b) (i)

Takondwa Tayanjana  
Income statement for the year to 31 May 2013

|                         | K              | K              |

## 6. (a) Statement of allocation of net profit/(loss) (or appropriation account)

|                                    | Total<br>K         | Baba<br>K        | Mama<br>K        | Kaka<br>K        |
|------------------------------------|--------------------|------------------|------------------|------------------|
| Interest on capital                | 340,000            | 200,000          | 40,000           | 100,000          |
| Balance of losses (shared equally) | <u>(2,914,000)</u> | <u>(971,334)</u> | <u>(971,333)</u> | <u>(971,333)</u> |
|                                    | <u>(2,574,000)</u> | <u>(771,334)</u> | <u>(931,333)</u> | <u>(871,333)</u> |

- (b) Drawings – these are charged  
 Other personal benefits – are charged  
 Salaries – these are credited  
 Interest on capital – is credited  
 Share of profits – these are credited

Others are share of losses, interest on drawings and bonuses.

- (c) Fixed capital accounts are partners' capital accounts that normally remain constant from year to year.

- (d) (i) Income statement

Sales, inventory and expenses of a partnership are the same as those of a sole trader. In this case, the income statement would be identical to that prepared for the sole trader. However, a partnership would have an extra section at the end of the income statement known as the profit and loss appropriation account. This is where the distribution of profit (or loss) among the partners is shown.

- (ii) The statement of financial position

For a partnership this is similar to that of a sole trader, except that the capital part is split between capital account and current account for different partners whereas for the sole trader, the capital account is not split since it is for the same individual.

- (e) Factors which may influence amount of purchased goodwill:

- (i) Number of regular customers who are likely to continue to deal with the new owner.
- (ii) When the business has a good reputation.
- (iii) Quality and caliber of employees (experienced and reliable). Also employee loyalty.
- (iv) If the business is situated in a good location.
- (v) If the firm has contacts with suppliers.
- (vi) Structures which the business has.
- (vii) Whether the firm can easily access resources (or simply availability of resources)

## 7. (a) Gross loss/profit

This is an amount that is computed where the cost of goods sold exceeds the sales revenue. Examples:

|                     | Example 1 | Example 2 |
|---------------------|-----------|-----------|
|                     | K         | K         |
| Turnover            | 628,457   | 110       |
| Cost of goods sold  | 628,459   | 101       |
| Gross/(loss)/profit | (2)       | 9         |

## (b) Credit card

A credit card is a card that enables the holder to make purchases and to draw cash up to pre-arranged limit. The credit card granted in a period can be settled in full or in part by the end of the specified period. Many credit cards carry no annual fees. Examples are many: various bonds, building societies and financial institutions issue these cards to their customers e.g. visa, master card, American express and diners.

## (c) Mark-up

Is a profit shown as a percentage or fraction of cost price. Examples:

|      |            |   |              |   |               |
|------|------------|---|--------------|---|---------------|
|      | Cost price | + | Gross profit | = | Selling price |
| (i)  | K4 million | + | K1 million   | = | K5 million    |
| (ii) | K1,607,201 | + | K392,799     | = | K2,000,000    |

Mark-up =  $\frac{\text{Gross profit}}{\text{Cost price}}$  as a fraction, or if required as a percentage, multiply by 100:

$$\frac{\text{K1 million}}{\text{K4 million}} = \frac{1}{4}, \text{ or } \frac{1}{4} \times 100 = 25 \text{ percent}$$

$$\frac{\text{K392,799}}{\text{K1,607,201}} = 0.24439943 = 24 \text{ percent}$$

## (d) Bank overdraft (or simply overdraft)

An overdraft is a facility granted by a bank that allows a customer holding a current account with the bank to spend more than the funds held in the account. Interest is charged daily on the amount of the overdraft on that date and the overdraft may be repayable by an agreed date or at banks such as anytime upon request from the bank. Such facilities may be arranged with Ecobank, FDH Investment Bank, First Merchant Bank, INDE Bank, Nedbank, Standard Bank, National Bank, Malawi Savings Bank, NBS Bank and International Commercial Bank.

## (e) Accumulated fund

Accumulated fund is a form of capital account for a non-profit-oriented organization. It is the difference between assets and liabilities for such organizations. Examples are:

|                  | Example 1: NFPO x | Example 2: NFOP |
|------------------|-------------------|-----------------|
|                  | K                 | K               |
| Assets           | 948,009           | 1,388,000       |
| Liabilities      | 54,367            | 1,087,702       |
| Accumulated fund | 893,642           | 300,298         |
