FINDING A NEW WAY TO WORK

The 21st century has already heralded the death knell for routine and repetition. The new global economy moves freely around the “i” generation; ideas, innovation, imagination and information are the new keys necessary to unlock market success. In a world of value-creating businesses, protectionism of any sort has gone forever - in favour of people coming together in the pursuit of projects, purpose and outcomes-based performance.

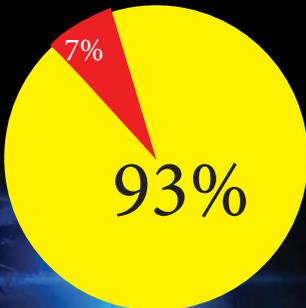

Fluid Teamwork is everything and requires connected, committed craftspeople.

As business seeks to find a new meaningful identity and positioning, how do you, and your business, stack up?

Finding a New Way to Work starts with individual recognition and awareness of this new business landscape and Michael reveals the ‘what, when and how’ necessary to achieve results with incredible insight and clarity. It’s all about working smarter; not harder.

“Michael’s skill in presenting combined with the subtle interplay of messaging relevant to the host company, ensures an impactful, memorable and enthralling conference presentation. As a presenter Michael has been rated no less than excellent by over 2800 audiences to date across Africa, Asia, Europe, the Middle East and the United States of America.”
